

their responsibilities seriously. We shall be very sorry indeed to lose all our Prefects this year. It is hard for me to express my gratitude to them for the tremendous help they have been to me. At all times they have been ready to help and, more often than not, they have anticipated the wish before it has been expressed. The School owes much to their unswerving loyalty to duty and the very high examples they have set. One reason why I regret that we are not doing the Senior is that we lose our older girls, and they are a great strength to the School. We hope that those who are leaving will link themselves to the School by becoming members of the O.G.A.

O.G.A.: The membership is steadily growing. Miss Gataker was appointed Secretary at the beginning of the year, and Miss Chauvel is still the Treasurer. This Association is of great value to the School. I have found the members ever ready to help us at any time when there is need. I said in my report last year that the O.G.A. was prepared to connect the large underground tank with the house. Unfortunately a mistake was made in the estimate, which was given for a two-phase motor instead of a three-phase one. The cost was raised from about £28 to approximately £41. This was a great blow. Mrs. Gilling, with her usual readiness to help, came forward and offered to assist by getting up a Bridge Party. She and Mrs. C. F. White organised an excellent Bridge Party, and the large sum of £23 was the result. Mrs. Gilling then said that she would like to be responsible for the whole cost of the connection, and we are very glad to leave it in her hands. The abundant rain has made it unnecessary to have the work done immediately. The O.G.A., relieved of their responsibility re the tank, have agreed to my suggestion that they should get the School a wireless set. We do need it very badly. It is not fair to either the Staff or the girls to be without one. We are cut off from a lot of pleasures and good entertainments, and we feel this especially in the winter. We have long envied those who are the possessors of wireless and can listen in to good concerts, lectures, etc. The O.G.A. has at least £15 in hand for that purpose, and I can get a very good, guaranteed six-valve set with a rectifier, for about £20 to £22. I hope the friends who have been so generous and willing to help in the past will assist both Mrs. Gilling and the O.G.A. next year to complete the cost of these two objects, the tank and the wireless.

CARNIVAL: We have again to thank the many friends who made the Carnival held early in May such a very great success. The Ladies' Committee was wonderful. The whole affair was
