The Sports' successes of last year were mainly due to development of the team spirit. However, it is not only in games that this spirit should appear, but there should be traces of it in all paths of life. A number of people working together for a worthy object cannot fail. In school life let that object be the good of the school. Then not only will the school prosper, but each girl will, herself, unconsciously be gaining.

Every member of a team must be loyal, and this way gives unity. Without this there can be little hope of success. For it has been illustrated again and again in the world that unity is strength. Let every member cultivate a feeling of loyalty, love, honour, and truth towards the school, and then each one will be giving her share towards the gaining of that unity wherein lies the strength of the school. At the same time her own character will become stronger and she will develop those traits which will give to her a more noble and worthy personality.
